SUMMARY

Full-stack developer and DevOps-minded engineer building production web products, secure APIs, and reliable Linux systems. Experienced with React and TypeScript, Node and Express APIs, Python automation, cloud deployment, security testing, and technical documentation. Currently pursuing a B.Sc. in Computer Science at the University of Hargeisa.

EXPERIENCE

Freelance Web Developer | Samaale General Trading Co.

Jun 2026 - Aug 2026

Hargeisa, Somaliland | Hybrid

- Architected and shipped a production B2B trading platform using React 19, TypeScript, and Vite, structuring 30+ source files and approximately 9,000 lines of code around strict type-safe models.
- Improved load performance with React.lazy code splitting, IntersectionObserver-based lazy rendering, and vendor chunk splitting for faster time to interactive.
- Built a bilingual English/Somali interface with React Context and secured a Cloudflare Workers API with Turnstile, field validation, and SHA-256 rate limiting.
- Delivered accessible workflows with a custom focus-trap hook, a Leaflet logistics map, and a decoupled browser event architecture.

Linux System Administrator | Freelance

Mar 2024 - Feb 2025

Small business clients | Hargeisa, Somaliland

- Reduced repetitive security work by 30% and saved approximately 8 hours per week by automating log analysis and patch checks with Python.
- Improved system uptime by 20% through Nagios monitoring, kernel tuning, and incident response averaging under two hours.
- Hardened 15+ Ubuntu and RHEL servers with SSH controls, firewalls, sudo policies, and repeatable security checks.

Security & Software Engineering Intern | Confidential Family-Owned Business

Jun 2024 - Aug 2024

Hargeisa, Somaliland

- Mapped internal web applications and network services, identifying 12 high-priority issues and translating them into actionable engineering fixes.
- Tested authentication, access control, Linux services, and network tooling with Nmap and Burp Suite, then documented remediation guidance for the team.

EDUCATION

B.Sc. Computer Science | University of Hargeisa

2023 - Expected 2027

GPA: 3.6/4.0 | Network Security, Cryptography, Web Application Security, Secure SDLC, Operating Systems

SELECTED PROJECTS

Cyber Attack Monitoring Dashboard | Next.js, TypeScript, Tailwind CSS, Vercel

Built a threat-intelligence workspace with server-side API proxying, live IP reputation and CVE lookups, risk scoring, mitigation guidance, and production security headers.

Gabay Keeper | React, TypeScript, Firebase, Tesseract.js

Created a private digital archive for Somali oral poetry with structured metadata, per-user Firestore security rules, client-side OCR, search, and visual poem-card exports.

Full-Stack Portfolio Platform | React 19, TypeScript, Vite, Vercel Functions

Built this portfolio as a production product with Markdown publishing, protected contact, Google Calendar booking, prerendered SEO assets, and security-minded deployment controls.

TECHNICAL SKILLS

Web & Software: React 19, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, Node.js, Express, REST APIs, Firebase, Git, GitHub, HTML, CSS, Framer Motion

Systems & DevOps: Linux (Ubuntu, RHEL, CentOS), Bash, Python, Java, C, Nagios, VMware, VirtualBox, CI/CD, Vercel, Netlify, Cloudflare Workers

Security: Nmap, Nessus, OpenVAS, Burp Suite, Metasploit, Wireshark, SSH hardening, firewalls, OWASP Top 10, CVSS, access control, vulnerability assessment

Languages: Somali (Native), English (Professional working proficiency), Arabic (Conversational)
