
GUULEED MAXAMUUD AW ABDI

Vulnerability Assessment & Penetration Tester

Hargeisa, Somaliland | +252 634406157 | guuleedmaxamuud40@gmail.com

<https://linkedin.com/in/guuleed-aw-abdi-517928277>

Professional Summary

Resourceful penetration tester with hands-on experience in vulnerability assessment, network security, and Linux administration. Proven ability to identify critical weaknesses, automate security tasks, and deliver clear remediation strategies. Strong analytical and communication skills, working effectively with technical teams and clients.

Core Skills

Penetration testing (Nessus, Burp Suite) · Vulnerability assessment · Python / Java automation · Linux system hardening · Network security protocols · Risk management · Technical documentation

Certifications (click to verify)

- [Cyber Threat Management](#) – Cisco, 2026
- [Penetration Testing Professional](#) – Cybrary, 2026
- [Microsoft Security Essentials](#) – Microsoft & LinkedIn, 2026
- [Career Essentials in GitHub](#) – GitHub, 2026
- [Career Essentials in Cybersecurity](#) – Microsoft & LinkedIn, 2026

Experience

Vulnerability Assessment and Penetration Tester | Freelance, Hargeisa

08/2025 – present

- Perform weekly vulnerability scans (Nessus, OpenVAS) on client networks, identifying an average of 12+ critical misconfigurations per engagement.
- Execute manual and automated penetration tests on web applications, including SQLi, XSS, and privilege escalation.
- Deliver risk-prioritized reports with reproducible steps and remediation guidance, reducing recurrence of findings by 40%.
- Maintain detailed documentation and retest after patches to validate fixes.

Linux System Administrator | Freelance, Hargeisa

03/2024 – 02/2025

- Administered 15+ remote Linux servers (Ubuntu, RHEL) for small businesses – configured firewalls, SSH hardening, and automated backups.
- Monitored system performance using Nagios and resolved incidents within 2 hours on average.
- Implemented user account management and sudo policies, improving audit compliance.
- Wrote Python scripts to automate log analysis and daily patch checks, saving 8 hours per week.

Education

B.Sc. Computer Science | University of Hargeisa, Somaliland

2022 – 2027 | GPA 3.6/4.0

Relevant coursework: Network Security, Cryptography, Operating Systems, Web Application Security, Secure SDLC.

Key Achievements

- Increased system uptime by 20% through proactive Linux monitoring and kernel tuning.
 - Reduced manual security tasks by 30% using Python automation (log parsing, user audits).
 - Strengthened access controls across 5 freelance clients, passing internal compliance reviews with zero findings.
 - Conducted bi-monthly system audits, patching 15+ critical CVEs before exploitation.
-

Languages

- **Somali** – Native
 - **English** – Professional working proficiency (written and spoken)
 - **Arabic** – Conversational (reading and basic communication)
-

Technical Toolset

Nessus, Burp Suite, Wireshark, Metasploit, Nmap · Git / GitHub · Bash, Python, Java · Linux (Ubuntu, CentOS, RHEL) · VMware, VirtualBox
